

Instructions for Developing an Extended, Accelerated, or Differentiated Program for Fifth or Sixth Grade Students

Since fifth graders fall under guidelines of EIP, programs for those fifth-graders who have been retained may be developed along the same lines as programs developed for third and fourth graders. Refer to the document, [Instructions for Developing an Extended, Accelerated, or Differentiated Program for Third or Fourth Grade Students](#) for more information. This document is available on the web at <http://www.apskids.org/teach>. From the home page, select the link to Promotion/Retention to find the document.

At the present time, the State DOE has not given instructions for developing and funding programs for those students who have been promoted to sixth grade as a result of the appeal process. Information should be coming soon, however, so check <http://www.apskids.org/teach> for updates from the State when they become available.
